PRODUCT DATA SHEET

Medic / Dog Handler Shield SLD550 MDS

General Description	Lightweight protective shield. The forearm loop allows the shield to be retained while leaving both hands free to use other equipment.
Sizes available	550mm diameter x 3mm thickness.
Construction	3mm thick, clear Makralon Polycarbonate. Offers excellent resistance to impacts, thrown objects and liquids, while giving the user an excellent field of vision ahead.
Handles	Quick release Velcro fastened forearm straps and an aluminium grab handle. Bolted through the blade and backing plate for maximum strength and security. Alternative handles are available. Additional fold-away shoulder strap included.
Impact absorption	Shield handles are mounted on a foam/aluminium backing plate which significantly reduces transmission of vibration to the forearm and through the handles.
Warranty/Service Life	12 months warranty against defects in materials/workmanship. If used in accordance with the user instructions and not subject to damage anticipated service life is 5 years.
Weight	1.5kg
